

# Conference Networks

**Conference Centre Network and WiFi Automation**

## **BRANDED GUEST WI-FI**

Ensuring stable WiFi is critical as your guests expect a reliable service. Custom branding, integration, monitoring and data collection are critical aspects to monetizing your WiFi; all things we do. Our experience is unmatched and our patent and trademarks prove that.

## **VALUE ADDED MODULES**

Our Fail-Safe Redundancy platform offers a hot standby system to ensure your WiFi never goes down. Our extensive list of PMS and POS integrations ensures that guest information and transactions flow freely from our platform. Lastly, our Conference Network Management Software allows you to seamlessly manage conference network resources.

## **ON-PREMISE AND CLOUD SOLUTIONS AVAILABLE**

Depending on the type of deployment, take your choice of our on-premise or cloud solutions which offer a variety of features to suit your business requirements. Partners should consider white-labelling our solution to sell with your suite of products.

# Solution Benefits

## Conference Centre Network and WiFi Automation

### BANDWIDTH & BILLING

Offer different billing and bandwidth options to provide flexible alternatives to your guests and avoid “bandwidth hogs”. Business rules also include: charging to a guest room, offer free service in public areas, or provide VIP access with certain packages.

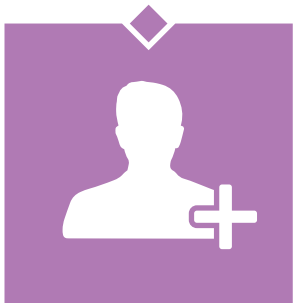

*Everything from look and feel, to welcome messaging, advertising, languages, and so much more. The design settings are specific to your network and business needs and we give you the tools to set-up and manage them.*

### SUPPORT SERVICES

Adding our 24/7/365 help desk ensures that your guests and IT staff always have access to a knowledgeable SolutionInc team member to aid them with their questions. These are optional add-ons for guest support and/or in-depth technical support.

*Increase convenience for your guests by enabling our “remember me” functionality. This ensures that guests are not forced to authenticate their devices every time they return to your location, or as they roam around your facility.*

### EASILY ONBOARD VENDORS

Provide event or conference vendors and sponsors with an easy device onboarding system. This allows them to quickly and easily add and manage their technologies to your venue WiFi network which also keeps their traffic separate from attendees.
