

Other Solutions

SolutionIP X®

SolutionIP X is the next generation of managed Wi-Fi gateway platforms. Easy to deploy and configure, our new modern, multi-tenant platform allows you to manage a multitude of property networks from one location.

Conference Creo

Make meeting room network configuration and management easy with Conference Creo. This network configuration tool allows IT managers to pre-design and automate network resources available to conference attendees and exhibitors. Save time in configuring your public Wi-Fi network with Conference Creo.

Network Services

Engage our professional network services for project management, site assessment, site design, or site installation activities. Our CWNA certified engineers and PMP certified project managers will help you understand, evaluate, or implement a high quality network experience.

About Us

We were founded in 1997 in Nova Scotia, Canada with the vision of providing simple access to the Internet on public networks.

Today, we provide world-class managed Wi-Fi technology solutions for hotels, vacation rentals, student housing, multi-dwelling units, and senior living facilities. With our patented solutions and experienced staff, we have the knowledge and experience to assist you in creating outstanding Wi-Fi user experiences for your customers.

Helping you optimize your network is what we strive for every day.

Your Wi-Fi Problems.
Our Solutions.

Conference Connectivity

SolutionInc

About Exhibitor Connect

The Exhibitor Connect add-on module gets your conference exhibitors online within a secure network segment with very little manual technical work required by conference centre staff.

This module empowers conference exhibitors to create and manage their own Private Network Group, while auto-provisioning network resources to simplify and automate their Wi-Fi onboarding experience. The system has the added benefit of being customizable for each convention center or conference.

Exhibit Managers

The Exhibitor Connect feature provides exhibitors with the functionality to privately manage their wired and wireless devices, including smart devices (like printers, TVs, etc), within their booth.

This self managed portal allows exhibitors to add and remove devices to their service package while keeping their device details segregated and secure from other vendors.

Customized event/venue branding or messaging

Easy access code Wi-Fi authentication

24/7/365 Help Desk via Phone or E-mail

Private Network Groups

Our self-serve portal provides a secure Wi-Fi connection to users and allows them to onboard and manage their own devices, eliminating network support complaints and empowering users to manage their own secure private network.

This service is ideal for settings where many individuals share a common network infrastructure. It can also be integrated with Dynamic Pre-Shared Keys.

Conference Centers

Offer your conference managers a new branding opportunity with Exhibitor Connect through custom branded Exhibitor Wi-Fi.

Not only can you promote more secure network access, but the system is easy to use and allows bandwidth management to ensure all exhibitors receive fair and equal service.

An easy to navigate administration tool ensures that on-site assistance is quick and easy, minimizing long lines of exhibitor questions.

Why Choose SolutionInc?

- 1** We have been in the hospitality industry for more than 25 years.
- 2** Our research, development and quality assurance teams are based in North America, making us very agile.
- 3** We understand the partner ecosystem and we support your sales efforts.
- 4** We know how difficult technology can be for people and we strive to make it easy.
- 5** Our staff is professionally trained and certified.
